PREPUBLICATION ANNOUNCEMENT!

Understand the foundations and frameworks of terrorism—and explore programs to prevent and counteract its effects

The Trauma of Terrorism
Sharing Knowledge and Shared Care
An International Handbook

Edited by Yael Danieli, PhD
Director, Group Project for Holocaust Survivors and their Children, New York, New York, USA

Danny Brom, PhD
Director, Israel Center for the Treatment of Psyotrauma, Herzog Hospital, Jerusalem, Israel

Joe Sills, MA
United Nations Secretariat (ret.), Nashville, Tennessee, USA

ENTHUSIASTIC REVIEWS!

“Danieli, Brom, and Sills have compiled A MOST USEFUL TEXT ON THE PSYCHOLOGY OF TERRORISM that should be REQUIRED READING not only for mental health professionals and academicians, but for emergency managers, public health officials, and other decision makers charged with ensuring that disasters are well managed. This is the definitive review of technical knowledge about trauma risk according to type of emergency, demographics, social and cultural variables, prevention, mitigation, and treatment—illustrated by excellent case studies. It is a fascinating book, which will serve as AN AUTHORITATIVE SOURCE OF INFORMATION ON THE PSYCHOSOCIAL IMPACT OF TERRORISM for many years to come.”

—Eric K. Noji, MD, MPH, Senior Policy Advisor, Office of Terrorism Preparedness & Emergency Response, Centers for Disease Control & Prevention (CDC), Washington, DC

“Once again Yael Danieli, this time with Danny Brom and Joe Sills, has illuminated a very poignant, and contemporary, human problem. The trauma of terrorism and its consequences now affect an ever-widening group of human beings. Danieli’s book sees terrorism as a form of psychological warfare against whole communities, even nations. She analyses its effects and suggests ways in which the resilience of both individuals and groups can be strengthened against this insidious, and now increasingly common, plague. THIS IS A MOST VALUABLE WORK.”

—Sir Brian Urquhart, Former Under-Secretary General of the United Nations

“This work sheds new light on the collective experience of societies who must now live with growing levels of threat, anxiety, fear and loss, as this is the nature and purpose of terrorism. THIS BOOK IS A MOST VALUABLE CONTRIBUTION to those who must integrate and make sense of the new reality we all share after 9/11.”

—Ambassador Colette Avital, Member of the Israeli Knesset

Learn intervention strategies to counter the effects of terrorism

In the twenty-first century, terrorism has become an international scourge whose effect devastates individuals, weakens societies, and cripples nations. The Trauma of Terrorism: Sharing Knowledge and Shared Care, An International Handbook provides a comprehensive, penetrating look at the effects of terrorism, at the prevention and treatment of immediate and long-term sequelae, at preparedness for terrorism, and at the range of individual, community, and national responses. International authorities discuss the latest knowledge and research about terror, its root causes, and its psychological impact on individuals, families, societies, and nations, as well as the societal and political responses and services that may help lessen its impact.

Continued on next page...
The Trauma of Terrorism: Sharing Knowledge and Shared Care, An International Handbook analyzes the full scope of terrorism. This compendium explores numerous issues in detail, such as the nature and psychology of terrorism, how to foster a community’s capacity for resilience, the psychosocial consequences of terrorism in children and adults, the centrality of traumatic grief, the need for multicultural understanding in services and treatment, interventions for children and adolescents, training programs for mental health professionals, and proactive community organization in the face of terrorism.

Treatment options and services are thoroughly explored and their effectiveness evaluated. Chapters are international in scope, well-referenced, and geared to provide thoroughly reasoned recommendations to lessen the effects of terrorism. Helpful tables and graphs clearly illustrate data and ideas. Original witness voices from survivors and professionals worldwide give depth to the scientific character of the book.

The Trauma of Terrorism: Sharing Knowledge and Shared Care, An International Handbook presents in-depth examinations of:

- the origins of terrorism in modern society
- the psychological consequences of terrorism
- the impact of terrorism on individuals, groups, and society
- psychological first aid, acute and long-term treatment following terrorist attacks
- school- and community-based interventions in the face of terrorist attacks
- a multi-component model of preparing providers in communities affected by terrorism
- individual and community preparedness: new methods of mental health services for the twenty-first century

The Trauma of Terrorism: Sharing Knowledge and Shared Care, An International Handbook is essential reading for mental health professionals—psychiatrists, psychologists, social workers, physicians, nurses, and administrators; researchers in social sciences, political scientists, international lawyers, international organizations and policy makers; as well as first responders, volunteers, clergy, and media.

**About the Editors**

**Yael Danieli, PhD,** is Co-founder and Director of the Group Project for Holocaust Survivors and Their Children in New York City area. She is a clinical psychologist in private practice who has conducted extensive psychotherapeutic work and study with survivors and their children. She has published five books, including three highly influential volumes for the United Nations, and numerous book chapters and journal articles. Dr. Danieli is also Adjunct Associate Professor of Medicine at Seton Hall University School of Graduate Medical Education in New Jersey. She has served as the senior representative to the UN of the World Federation for Mental Health and the International Society for Traumatic Stress Studies, of which she was Co-founder, President and recipient of the Lifetime Achievement Award; as well as consultant to numerous governments, international organizations and institutions on victims and protectors’ rights and optimal care.

**Danny Brom, PhD,** is the founding Director of the Israel Center for the Treatment of Psychotrauma of Herzog Hospital in Jerusalem and teaches at the Department of Clinical Psychology of Hebrew University of Jerusalem. He has worked for years in the field of traumatic stress and in 1989 was appointed Director of the Latner Institute for Research in Social Psychiatry and Psychotherapy at Herzog Hospital in Jerusalem. He has published extensively and is Chairman of the Israel Trauma Coalition. His main interests lie in the prevention, treatment, and research of the consequences of traumatic stress.

Joe Sills, MA, retired from the United Nations in January 1999. Prior to joining the Secretariat, he was Vice-President of the United Nations Association of the United States of America. During his 17 years at the United Nations, he was Associate Spokesman for Secretary-General Javier Pérez de Cuéllar, Spokesman for Secretary-General Boutros Boutros-Ghali, and Director of the UN Information Center in Washington, DC. He was also responsible for the information programs of the International Conference on Drug Abuse and Illicit Trafficking (1985) and the Conference on Environment and Development (1992). Since leaving the Secretariat, he has been a consultant to the UN Compensation Commission, the UN Office for Drug Control and Crime Prevention, the International Labour Organization, the American Council for the United Nations University, and the UN Foundation. He also co-chaired the Corporate Council on Africa’s task force on HIV/AIDS in southern Africa.
